Best feet forward!

Josephine Ndoro, a podiatrist, is on a mission to improve the foot health of the population of Merseyside by offering holistic, people-centred podiatry and chiropody services at Feet Galore (also known as Foot Galore), her practice. Her husband, Isaac, the business manager at Feet Galore, tells the *Connection*, “Currently, we have around 200 patients, but we’d like to double that number.” He says they plan to open another

clinic in Liverpool, which will allow them to serve the entire community between Liverpool and Chester.

Josephine sees up to 10 patients a day and brings a unique approach to foot health, due to her background in biomedical sciences and mental health. Services include foot baths, diabetes assessments and check-ups, and a range of treatments. “We don’t just cut toenails,” Isaac says.

Josephine adds, “Everyone spends so much time on their feet—they need looking after, and that’s where we come in.”
